SUMMARY

Full-stack JavaScript developer with a background in animal care. I trained at the University of Central Florida boot camp to earn a certificate in full stack web development focused on JavaScript. It was a dream on and off as a kid to learn coding. I took a MATLAB coding class back in college and really enjoyed the challenge. Teamwork and creativity are always my go to when looking for a job to build my skills building projects.

TECHNICAL SKILLS

Softwares/Platforms: HTML, CSS, React, Bulma, APIs, Node.js, Express, MySQL sequelize.
Software Languages: JavaScript and MATLAB

PROJECTS

Dis-Cover Music | https://github.com/CoolJH2K/dis-cover-music | https://cooljh2k.github.io/dis-cover-music/

- Give users the ability to find their favorite songs on Spotify then find a corresponding cover of that song on YouTube.
- My main focus for this project was HTML and CSS to make the project look great on the homepage where the user finds their music. I also made sure the buttons took the user to the corresponding pages on click.
- HTML, CSS, YouTube and Spotify APIs, and JavaScript.

Mental Health Tracker | https://github.com/DavidPeguero/Mental-Oasis | https://mental-oasis.herokuapp.com/

- We wanted to create a space for a user to come and keep track of their daily habits and overall mood.
- My main role for this project was to build the pages using express-handlebars and CSS.
- Express-handlebars, Node.js, mysql2 sequelize, and bcrypt.

Stream Verse | https://github.com/emilymclean94/movie-nova | https://streamversee.herokuapp.com/

- This app was made to help users keep track of their favorite movies that they have watched.

- My main focus was back-end. Using react and Mongo DB to connect the routes used to search a book and save it to the users watched list.
- Mongo DB, Express, React, No

EXPERIENCE

Veterinary Assistant
 2022-2022

Oviedo Veterinary Care and Emergency
 Oviedo, FL
 My main role was to help with animal care and communication between clients and the doctors. I would go into rooms get brief histories and relay them to the vet. I would then help the vet with any exams, go over all estimates, and discharge patients per the veterinarians' instructions.
Key Accomplishments:
- Client communications
- Teamwork
- Organizations
- Time Management

Veterinary Assistant
 2021-2022

Coastal Veterinarian Clinic
 Bluffton, SC
 Organization, cleaning, and patient care was my main responsibilities. It was my job to keep the clinic clean and organized. I restocked the rooms and treatment areas. I was also in charge of cleaning and preparing surgical instruments for surgeries. I assisted the veterinarians and technicians with exams and treatments of patients.
Key Accomplishments:
- Organizations
- Teamwork
- Patient care and recovery
- Cleaning
-

Head Kennel Technician/ Veterinary Assistant/ Reception
 2017-2021

Riverwalk Animal Hospital
 Ridgeland, SC
 My primary goal was keeping the kennel running smoothly and training new hires for kennel. I was also responsible for animal care (feeding, walking, and wellness) of boarders. I would also help out wherever I needed. I often worked in all aspects of the

clinic. Helping to answer phones, take payments, schedule appointments, help with patient care during appointments and treatments.

- Organizations
- Training
- Teamwork
- Patient Care

EDUCATION

Certificate: University of Central Florida, Orlando, FL.   Graduated 6/12/23.

A 12 week intense program that focused on gaining skills as a full-stack JavaScript developer.

Undergrade Marine Biology: University of South Carolina Beaufort, Hilton Head Island, SC

Unfinished 2015-2017
